Friends From Home

“The Hardest Part of leaving for college is leaving my high school friends.”

Roommates

New WFU Friends
Family

- Stay in touch: Texts, calls, FaceTime, packages

- Remember to let them know what is going on at home

- Don’t talk about weight (or appearance in general)
**Tips**

- Remember that college students are constantly balancing “what’s going on in here?” with “what’s going on out there?”
- Encourage your child to pursue opportunities that involve their interest to connect with new people and try something new.
- Help them understand that it is normal to feel excitement, homesickness, connected, disconnected all at the same time.
- Be their consultant around problems so they learn how to navigate to solutions on their own.
Resilience
Life is not about how fast you run or how high you climb but how well you bounce.

~Vivian Komori
Road Blocks to Resilience: Fear of Failure

- Not stepping outside of their “comfort zone”
- Lack of experience with set backs
- Well-intended “rescuing”

STOP

...and take a deep breath when your student contacts you with a problem. Is it really something he or she cannot solve on his or her own? If you fix it for him/her, does that help your student develop independence?

DROP

...the urge to reach out and immediately begin fixing things. Instead, push back with questions. What might you do? What options are you considering? What campus offices might have resources? *Additional deep breathing may be required.

ROLL

...with it. Let your student do the problem-solving on his/her own. The long-term benefits of building problem-solving skills and independence will last your student a lifetime.
